SUMMARY:

Software Developer with 3 years of experience building scalable mobile applications in Flutter, React Native, and Native Android. Skilled in REST/GraphQL API integration, state management, Firebase, and performance optimization, with proven experience across requirement analysis, deployment, and cross-team collaboration. Currently expanding into agentic AI development, building LLM-driven automation systems with Claude, Python, Playwright, and Next.js.

SKILLS:

- **Mobile:** Flutter, React Native, Native Android(Java), Ionic(Exposure)
- **Frontend:** HTML, CSS, Tailwind CSS, Bootstrap, React, Next.js(Working knowledge)
- **Languages:** Java, Python, Dart, JavaScript, TypeScript(Basic), Kotlin(Exposure in native android)
- **Backend & Cloud:** Firebase, REST APIs, AWS(Basic), Render(Deployment), Supabase(Basic)
- **AI & Automation:** LLM Integration(API-based), Prompt Workflows, Local LLM Deployment (Ollama), Playwright(Basic)
- **Tools & DevOps:** Git, GitHub, GitHub Actions(Basic), Google Play Console, App Store Connect, Roku Deployment
- **R&D & Project Skills:** Requirement Analysis, Technical clarifications, Project Modules Planning
- **AI Dev Tools:** Cursor, Claude, Antigravity, Codex, Github Copilot, ChatGPT, Gemini
- **IDEs & Development Environments:** VS Code, Android Studio, Xcode

PROFESSIONAL EXPERIENCE:

Software Developer | Oriental Outsourcing Consultants Pvt. Ltd., Punjab, India (Software Development Company)
August 2024 - Present

- Built and maintained mobile apps in Flutter, React Native, and Native Android, plus web apps in React, for international B2B clients.
- Integrated REST and GraphQL APIs with scalable state management, ensuring reliable cross-app data flow.
- Delivered production-ready builds through the full app development lifecycle - coding, testing, deployment, and release.
- Collaborated cross-functionally with backend, QA, and design teams and project leads to align features, resolve issues, and streamline delivery.
- Contributed to R&D evaluation of new project requirements, including technical clarifications, module breakdowns, and time estimation across 20+ projects.
- Maintained version control (Git), multi-environment configurations, and cross-platform performance consistency.
- Leveraged AI-assisted tools (Cursor, Claude, Chatgpt, Gemini, Antigravity) for development and R&D evaluation to accelerate coding, debugging, and requirement analysis.

Key projects worked upon:

- **Content Casting App (React Native):** Chromecast, AirPlay, and Roku TV support with secure local storage.
- **Roadside Assistance App (Flutter):** Live GPS tracking, Firebase push notifications, Firebase Analytics, Stripe payments, OTP authentication.
- **Health & Doctor Booking App (Flutter):** Payment integration (PhonePe), video/voice consultations (Agora), appointment scheduling.
- **Workforce Timesheet Tracking App (Flutter):** GraphQL APIs, GetX/BLoC architecture, PWA support.

- **Health Management App (Flutter):** Multi-timezone scheduling, multilingual support, Health Data charts.
- **E-commerce Services App (Flutter):** Live location, PWA support, service-marketplace booking flows.
- **Inventory Management System (Native Android):** RFID/QR/barcode scanning, offline-first local DB with sync.
- **SMS Automation App (Native Android):** Background task scheduling, automated messaging pipeline.
- **Video Creation Platform (React):** FFmpeg integration, Stripe payments, reCAPTCHA, Tailwind CSS.
- **Health & Fitness SaaS Platform (React + Next JS):** Design Development via wireframes, UI consistency, backend API integration.
- **Roadside Assistance - Company Website (HTML, CSS, JS):** Built multi-page marketing site with live service request flow, chat assistant, and booking pages using AI-assisted development (Cursor) from Figma wireframes.

Internship | Oriental Outsourcing Consultants Pvt. Ltd., Punjab, India (Software Development Company)

August 2023 - July 2024

- Trained and delivered live-project work across Flutter, React Native, Ionic, and Native Android.
- Built UI screens, integrated APIs, and resolved bugs across multiple production apps.
- Implemented authentication flows, push notifications, and local storage across multiple projects under senior developer guidance.
- Shipped applications to Play Store and App Store, gaining hands-on release-process experience.

PROJECTS DEVELOPED:

- **AI Timesheet Automation System (Python, Playwright, LLM Integration):** LLM-driven Playwright automation for timesheet generation/submission, saving 15 min/day; Next.js frontend with multi-user scheduling, credit-based usage, low-memory (512MB) deployment.
- **WordAssist – Floating Dictionary Overlay (Native Android, Java):** System-wide overlay via AccessibilityService/WindowManager, Retrofit dictionary API, dual-mode text capture, Room (SQLite) history.
- **AI-Powered Job Search Agent (Python, FastAPI, SQLite):** Multi-ATS job pipeline (Greenhouse, Lever, Ashby, Workday) with rule-based + AI matching (OpenAI, Anthropic, Gemini), scheduled scans, Telegram alerts.
- **AI Bidding Platform (TypeScript, Python, FastAPI, Next.js):** Multi-tenant AI bid-drafting SaaS with human-gated review; FastAPI/PostgreSQL (RLS), pgvector RAG, Celery pipeline, Redis Redlock collision prevention.

EDUCATION:

Bachelors of Engineering in Computer Science (9.45 CGPA)

Chitkara University, Punjab, India

CERTIFICATION AND TRAINING:

- **Hartron Core JAVA Certification** by Haryana State Electronics Development Corporation Ltd.
- **Problem Solving Using Python** by Coding Ninjas
- **Intro to Web Technologies** by Coding Ninjas
- **Object-Oriented Programming** by Coding Ninjas
- **Advanced Web Development** by Coding Ninjas
- **Claude Certified Developer Foundations** by Anthropic (In Progress)
- **Full Stack Generative & Agentic AI with Python** by Udemy (In Progress)
